

1      *Ch 15* 15. (New) The terminal plug of claim 14, wherein said flange further  
2      comprises a recess, said recess communicating with said longitudinal slot.

1      (o) 110 531221J do w/ 17 16. (New) The terminal plug of claim 14, wherein said longitudinal slot  
2      further comprises a slotted wall.

1      (o) 110 531221J do w/ 18 17. (New) The terminal plug of claim 16, wherein said slotted wall  
2      comprises a plurality of teeth.

1      (o) 110 531221J 112 18. (New) The terminal plug of claim 17, wherein said longitudinal slot  
2      has an upper end proximate said flange and bottom end and said plurality of teeth  
3      become small beginning from the upper end to said bottom end.

2      *Q2* *Cont.* 19. (New) A terminal plug for securing a muntin bar or cross to a spacer  
frame comprising:

3      a body having a longitudinal axis, a longitudinal slot coaxially aligned with  
4      said axis, said longitudinal slot having an upper end and a bottom end and a plurality  
5      of teeth;

6      a plurality of laminally formed spring elements extending from said body and  
7      adapted to engage an inner wall of a muntin bar; and

8      a flange secured to said body proximate said upper end and adapted to engage  
9      an end of a muntin bar or cross, ~~said flange having a recess in communication with~~  
10     ~~said longitudinal slot.~~
